

## Herbert Clarke *Technical Studies*

---

This preparatory exercise is from a series of articles published in "Brass Bulletin" (1980), by James Stamp, called **Practical Hints**. Here, Stamp show how to practice the "Technical Studies" by **Herbert L. Clarke**.

---

### First Study

Start by re-numbering the lines of this study as follows: line 13=1, line 14=2, line 12=3, line 15=4, etc.

Example: (*line 1 (13)*)

Play legato

The additional portion (bar 2, the repeated c - b) is only played first time.

By practising like this you will learn to "place" and "centre" your notes correctly, and to improve the fluency, flexibility and intonation of your playing.
